Dear Matalco customer,

**Re: Statement of Conformity for Per- and polyfluoroalkyl substances (PFAS) Compliance**

Per- and poly-fluoroalkyl substances (PFAS) are a group of emerging, man-made chemicals used in a wide variety of industries including firefighting, aerospace, photographic imaging, electrical engineering, automotive, construction, electronics, and aviation industries.

Matalco hereby affirm and declare that, to the best of our knowledge, the metallic products we produce, identified herein as "articles", do not contain any PFAS. Our commitment to PFAS compliance is aligned with the following principles:

1. Our products are manufactured in adherence to strict standards that ensure the absence of PFAS, aligning with environmentally responsible practices. We confirm that we have systems in place to ensure no PFAS is contained or added to our products.
2. We work closely with our suppliers to ensure materials and components used in our processes are PFAS compliant, emphasizing the importance of environmentally friendly and sustainable sourcing practices.
3. We have taken proactive measures to ensure our products comply with all applicable local, national, and international regulations in PFAS. We are committed to continuously monitoring and improving our material compliance process to ensure our products are compliant.

Should you have any questions or require further information, please do not hesitate to contact your Matalco sales representative.

Sincerely,

*Ashley Jacoby*
